The right way to go™

Natural appearance.  
Armored surface.  
Carefree enjoyment.

You want a deck that delivers the natural appearance of real wood without the upkeep. You want carefree enjoyment season after season. With Latitudes decking, you can have it all: a natural-looking composite decking in a variety of finishes with the widest range of colors, railing options and accessories available. You can have a deck that looks and performs just the way you want, while expressing your particular tastes and style.

Latitudes composite decking comes in four distinct looks and performance grades—Capricorn, Captiva, Intrepid and Wave. Simply find the one that's right for your budget, building needs and tastes. All are made with time-tested Strandex® technology, providing maximum protection against weathering and insect damage. Our premier lines are capped with durable polymers that keep their good looks and performance even after the toughest, most rigorous use. With this technology capping our proven Strandex® core, you can rest assured that your Latitudes deck will retain its beauty and strength for decades to come.

Uncompromising beauty and durability. Unbelievably easy upkeep. Unparalleled design flexibility. Everything tells you that Latitudes is the right way to go.

Captiva willow decking

## Three simple steps for designing an out-of-this-world Latitudes® deck.

### Choose your decking.

Select Latitudes Capricorn®, Latitudes Captiva™, Latitudes Intrepid™ or Latitudes Wave™ decking to get the color, surface texture and performance characteristics you want.

### Choose your railing.

Choose from a wide range of Latitudes railing, balusters and post cap options to give your deck a distinctive look, customized to your style.

### Choose your accessories.

Finishing touches such as lighting, deck stones and designer post caps add style and functionality to your deck—and Latitudes has a wide array to choose from.

Capricorn arabica decking with riverstone granite deck stones and recessed lighting

## Latitudes Capricorn® Decking

Inspired by some of the most beautiful timbers from the farthest points of the globe, and capped with technology that stands the test of time, this award-winning composite decking takes nature up a notch. With Latitudes Capricorn Decking, your back yard will be the talk of the town and the envy of the neighborhood.

You'll have to look very closely to see that Latitudes Capricorn isn't real tropical hardwood. It's constructed from our special blend of wood fiber and plastics and capped with some of the most

durable polymer technology available. That means it can withstand heavy traffic, take a beating from Mother Nature, and still retain its exotic beauty.

Latitudes Capricorn delivers exceptional resistance to fading, water damage, staining and scratching leaving you with a smooth, beautiful deck surface, season after season.

Capricorn koa

## Latitudes Capricorn® Color Options

Arabica

Koa

### Cap stock

Latitudes Capricorn is capped with a resilient polymer technology, so it will withstand the ravages of weather, time and use. Best of all, it looks like real wood, with a true-to-life variegated wood grain surface that comes in two exotic colors—koa and arabica. And like the real thing, no two boards are alike. With this new cap stock technology, your deck will look gorgeous, resist scratching and be remarkably easy to clean. Beautiful and virtually maintenance-free. It's the right way to go.

**Strandex®** technology resists the effects of weather and decay in every climate. Our exclusive material blend includes wood fiber ground to a fine consistency—like flour—allowing for a more uniform look throughout the board. And, unlike other composite products, the plastic used in Latitudes contains no post-consumer scrap, which means you get reliable long-term performance. It's why Strandex is the composite material builders trust most.

Contour and solid profile

Captiva gray decking

## Latitudes Captiva™ Decking

Latitudes Captiva decking offers many of the finer aesthetic and performance qualities of Capricorn—at a temptingly lower price.

Like Capricorn, Captiva is capped with rugged technology that allows it to be stain and fade resistant. Its natural-looking willow, walnut, cedar and gray colors and woodgrain finish make Captiva the perfect blend of beauty and performance. It will withstand years of heavy use and harsh weather to give you remarkably lasting beauty with the least amount of care.

Captivating looks. Easy, long-lasting performance at a surprisingly moderate price. You can see why Latitudes Captiva captures buyers' attention—and refuses to let go.

## The Equator® hidden fastener system

secures deck boards on their sides using our exclusive gap-wing clips (shown here) that attach to joists with a single stainless steel, color-matched screw. This system results in a beautiful, smooth and virtually fastener-free decking surface, while greatly speeding installation by automatically spacing boards at the proper intervals and eliminating the need for pre-drilling.

**EQUATOR**

## Slotted-edge profile boards

Latitudes Captiva slotted-edge decking is designed for use with our Equator hidden fastener and is encapsulated on one side. Solid-edge decking is also available for use on stairs and as a perimeter board.

Intrepid cedar decking and railing with composite balusters

## Latitudes Intrepid™ Decking and Railing

The original look, performance and reliability that Latitudes composite decking pioneered marches on. This ever-popular deck package offers major enhancements, such as patented hidden fasteners and a customizable railing design. For lasting beauty and carefree comfort, Latitudes Intrepid is always one step ahead.

Intrepid cedar decking

## Latitudes Intrepid™ Decking Colors

Cedar

Redwood

Gray

Walnut

**Strandex®** composite technology stands up to harsh weather and heavy traffic to deliver lasting beauty and durability. And while Latitudes Intrepid decking offers the look of wood decking most homeowners prefer, it spares you from the tedious upkeep you'd rather avoid.

**Reversible-surface boards** have a woodgrain pattern on one side and a brushed finish on the other. All Latitudes Intrepid decking is splinter-free, barefoot-friendly and slip-resistant.

**Solid-profile or slotted boards** give you the option of how to install your Latitudes Intrepid decking. Use conventional deck screws through the face to mount to solid-profile decking, or choose slotted boards to invisibly secure Latitudes along its sides using the Equator hidden fastener system.

Slotted and  
solid profile

**Latitudes Intrepid™ railing** makes the perfect perimeter for your Latitudes Intrepid or Wave deck, adding greatly to its beauty and functionality. Two distinct rail profiles and an unmatched selection of baluster options give you tremendous flexibility to design the deck of your dreams. The entire system is now much faster and easier to install. Plus, the restyled top rail is wide enough to easily hold drinks, perfect for entertaining. No coasters required.

### Intrepid railing with composite balusters

lets you match the style and color of the entire railing system to your Latitudes Intrepid or Wave decking. Or, mix and match colors in the railings and balusters

to create a unique design that expresses your personality. The engineered design neatly conceals the hardware that mounts the rails to the posts, giving your finished deck a cleaner, seamless look. Intrepid railing components are all made with the same durable Strandex® technology as Latitudes decking to provide longer-lasting beauty and durability.

Latitudes Intrepid Railing Colors

Post base trim adds an elegant touch to the foot of each post and comes standard with post sleeve kits.

### Intrepid railing with ornamental balusters

offers the widest selection of decorative balusters available today, letting you create a more stylized, highly customized look for your deck. All other components—the posts and top/bottom rails—are made with the same Strandex® composite technology as Latitudes decking for long lasting beauty with minimal care.

Our aluminum balusters come in designer colors with durable powder-coated finishes. Choose round, rectangle or more ornate arch or wave-shaped contour balusters made of heavy-gauge aluminum. Our square baluster adds flair with decorative connectors at the top and bottom. Ornamental railing is even available with crystal-clear, tempered glass slat balusters that provide a uniquely unobstructed view of your outdoor living space.

## Ornamental Railing Baluster Styles

Latitudes Intrepid™ railing offers six distinct ornamental baluster designs in multiple colors, providing unmatched flexibility to create a deck that expresses your individual taste and style. Four of these baluster styles (rectangular, arch, contour and glass) are designed to be mounted on the outside-face of 2x4 rails. The other two baluster styles—round and square—can be mounted inside Latitudes Intrepid cap rails (the same style rails used with composite balusters) or used with the 2x4 rails, if you prefer that look.

Arch, 32-1/4"

Contour, 32-1/4", 40"

Rectangular, 32-1/4"

Glass, 32-1/4", 29"

Square, 32"

Round, 32", 36"

Wave walnut decking with smoke slate deck stones

## Latitudes Wave™ Decking

Latitudes Wave decking offers the classic Latitudes look and feel at a more affordable price. The decking features Strandex® technology and is extruded with the same contoured profile as our capped decking. Available in walnut or gray, Wave comes in a contour profile with slotted edges or full profile with solid edges. It is also backed by a 25-year limited warranty.

Latitudes Wave decking can be accented with Latitudes Intrepid Railing and baluster options to give your deck the look you prefer. By pairing the low maintenance and reliability of Strandex with a rich woodgrain pattern, Latitudes Wave is the right way to go.

## Latitudes Wave™ Decking Colors

Gray

Walnut

**Strandex**® composite technology stands up to harsh weather and heavy traffic to deliver lasting beauty and durability. And, while Latitudes Wave decking offers the look of wood decking most homeowners prefer, it spares you the tedious upkeep you'd rather avoid.

Slotted-edge boards are available in 12', 16' and 20' lengths and give you the option to use a hidden fastener system like Latitudes Equator. Full profile, solid-edge boards are available for trimming the outer edge of decks and for use on stairs.

## Latitudes accessories

expand your horizons even further, letting you build distinctive and delightful features into your Latitudes deck that enhance both its beauty and functionality. Make your deck stand out—day and night—with ambient lighting, recessed step lighting and impressive deck stones.

Latitudes® Deck Stones add a unique visual focal point to your deck that's also extremely durable—perfect for high-traffic or wear areas like under barbecues or raised fire pits and in dining areas.

**Latitudes post cap options** are the perfect way to top off the look of any Latitudes deck. These artistic caps are often the most visible element of your deck, as well as the feature that creates the longest lasting impression.

**Latitudes recessed lighting** kits are perfect for illuminating stairs, entryways or other points of interest on the deck. Each has eight low-voltage, ultrabright LED lights and a transformer. Two-pack add-on kits and extension wire are available to easily expand lighting projects.

**Latitudes fascia** is available in 1/2" x 9-1/4" - 12' and 1/2" x 11-1/4" - 12' size to match all Latitudes decking colors. Decorative fascia is used to conceal the decking understructure; it is not intended for structural use.

Be the first in your circle to dress up your deck with our **decorative fascia corners**. Simple and unique, decorative fascia corners provide a stylish way to adorn deck skirting and cover unsightly corner joints. Available in two designs—ridge and leaf—these black powder-coated corner design elements install easily with eight screws (supplied) and are available in three different heights: 7, 9 and 11 inches.

## Latitudes Marine Decking

Superior water- and UV-resistance makes Latitudes Marine decking shipshape for building docks, boardwalks and other waterfront structures. Wood decking in the same application severely fades, warps, splits and rots, while Marine decking keeps looking great and performing well year after year. Plus, its slip-resistant finish provides more sure footing—an especially nice quality for surfaces that are often wet.

Latitudes Marine decking is offered in stouter boards (1-1/4" thick by 5-7/16" wide) designed for 24" on-center joint spans are common to marine construction. It is made using the same exclusive Strandex® technology as all of our Latitudes marine boards, comes in the same four colors, and provides the same exceptional longevity and low maintenance requirements. All of which makes Latitudes Marine decking the peerless choice for your next waterfront project.

## Color Variation and Fading

Like most composites, Latitudes Intrepid™ decking and railing will exhibit color variations from piece to piece. This results from naturally occurring variations in wood fibers and polymers. We recommend purchasing all required materials at once then inspecting them for color acceptance before installing, as manufacturing runs may produce slightly different colors.

Latitudes Intrepid and Wave decking and railing will lighten over time (see simulated examples below). This color-tone shift is dependent upon exposure to sunlight and other environmental factors, and is generally completed within 60 to 90 days. Gray-tone products may turn light brown before changing to lighter gray. Color variation is not covered by the Latitudes warranty.

Simulated tests have shown that Latitudes Capricorn® and Captiva™ decking display virtually no signs of fading and will remain at or near its original color.

Visit [LatitudesDeck.com](http://LatitudesDeck.com) to find a Latitudes Certified Installer near you.

## Secondary Handrails

Graspable secondary handrails are required by more and more building codes in areas across the country. Latitudes includes a secondary handrail system that's second to none: elegantly designed, offered in four attractive colors, durably constructed in aluminum and PVC, versatile enough to meet every conceivable installation challenge, and designed to work with any Latitudes railing.

Colors available: adobe, tan, white and black

Note: The colors represented herein are reproduced with printer's inks and may vary from actual factory products. For actual product colors and finishes, please visit your Latitudes dealer.

Latitudes composite decking and railing products are manufactured using Strandex® technology. Latitudes Wave, Intrepid decking and railing, Captiva decking, Capricorn decking and Marine decking (when used in residential applications) feature a 25-year limited warranty against structural damage. Latitudes Capricorn and Captiva are both covered by a 25-year limited stain and fade warranty. For complete warranty details, visit [latitudesdeck.com](http://latitudesdeck.com).

Latitudes Intrepid composite decking, along with the Equator® hidden fastener system, has been evaluated by ICC-ES to be code compliant with details listed under the ESR-1573 Evaluation Report. View all ESR reports on Latitudes composite decking and railing at [latitudesdeck.com](http://latitudesdeck.com).

The structural performance of the Latitudes Intrepid railing system has been evaluated through full-scale testing by Architectural Testing Inc (ATI). The results demonstrate that the different combinations of the railing system, as noted in ATI's CCRR Report 0150, comply with the 2009 International Building Code; 2009 International Residential Code; ICC-ES AC174/June 1, 2009; ASTM D7032-07; and ANSI Z97.1-2004.
